Internet of Thing

作業: 畫出藍綠雙球

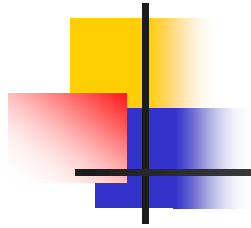

畫出藍綠雙球，代表藍綠互鬥XD(也可以加上座標框架，或加上簡諧運動)

The screenshot shows a Windows desktop environment. In the foreground, a VPython window is open, displaying a 3D rendering of a green sphere on a black background. The VPython window's title bar reads "VPython". To the left, a Notepad window titled "My 2nd Python" contains the following Python code:

```
from visual import *  
sphere(radius = .15, color = color.green, pos = vector(1,0,0))
```

In the background, a PowerPoint presentation is visible. The current slide features the text "Internet of Thing" in a stylized font, followed by "Sin Wang (PhD) / CGSH" in a smaller font. The slide number "9" is visible in the bottom right corner. The PowerPoint window's title bar reads "中港高物聯網(2)-VPhysics-201612 [相容模式] - PowerPoint". The Windows taskbar at the bottom shows the system tray with the date and time "下午 05:50 2016/12/22".
